SUGAR TRUST STOCK 'WATERED' \$500,000 TO PAY THE OXNARDS

(Continued from Page One.)

proved a mine of information on Thurs-

day. Representative Madison of Kansas, who conducted the examination, introduced as a basis of his questions a page from the minute books of the company's board of directors. It bore the date of Sept. 6, 1898, and its paramount feature was the authorization of a committee to buy outside refineries.

The page read: "On motion a special committee, consisting of the president, vice-president and Mr. Thomas, were appointed to fix the price of refined sugars. They were authorized in their discretion to make the price of granulated not less than three eighths above the price of centrifugals of 96 degree test; other refined sugars to correspond."

"They were authorized and empowered to purchase for account of the company, or hold, any portion of outside refineries at a price and upon terms to be fixed by them in their discretion."

Mr. Palmer told of the rebates received by the company, contending that it had merely got its share of the rebates in the days when such were in fashion.

Mr. Madison questioned the witness concerning the formation of the National Sugar Refining Company of New Jersey.

"It was organized to buy four companies," said the witness. "Mr. Havemeyer told me he had organized it with his own money and a little he had got from the National City Bank."

"Were not these companies competing?"

"Yes, I think they were."

Mr. Palmer also described the first sugar combination, in 1887. He said that H. O. Havemeyer came to his office to talk over sugar matters.

"He said that Searles and Theodore Havemeyer were foolish to go into combination," declared Mr. Palmer. "He said he was not so foolish unless he could get the Harrisons of Philadelphia—the Harrisons were keen sugar men—and Captain Thomas of Boston, a very wealthy man, worth say about \$30,000,000 or \$40,000,000 and president of the Standard Sugar Refining Company, at Boston, to go into it with him. He said Theodore would try to get the Harrisons, and he offered to give me \$100,000 if I could get Captain Thomas in."

"Did you get him?" inquired Representative Madison. Mr. Palmer said he did.

STATE IS CLOSING LAWRENCE PAVING TRIAL AT SALEM

SALEM, Mass.—Philip Holland was called to the stand today after the state had rested yesterday in the trial of Patrick J. Lyons, superintendent of streets; Michael Flynn, clerk in the street department, both of Lawrence, and Philip Holland, contractor of Lowell, who are charged with conspiracy to defraud the city of Lawrence, in the superior criminal court.

It is expected that the defense will finish this afternoon.

Arguments will be made to the jury on Monday.

FLOAT BUFFALO LAKE STEAMER

BUFFALO—The steamship Northwest of the Northern steamship line, which was burned and sank at her dock two weeks ago, has been refloated and will be surveyed today by representatives of marine insurance companies and officers of the line.

The loss, at first estimated at \$500,000, probably will not exceed \$250,000.

HAZARD YOUNGEST CAPTAIN.

PROVIDENCE, R. I.—Pilot Ellsworth Hazard, aged 26, of Block Island steamer New Shoreham, was made the youngest steamboat captain along this section of the Atlantic coast today, when he was promoted to command the steamer Block Island, which runs from New London to Block Island. He will take command Thursday next week.

NO INCREASE FOR LEGISLATORS.

HARRISBURG, Pa.—Governor Tener has vetoed a bill increasing the salaries of members of the Legislature from \$1500 a session to \$2400. He says the state revenues will not stand it. At the same time the Governor vetoed other proposed increases of salaries in various departments of the state government.

BREAKS WORLD RECORD FOR SUSTAINED FLIGHT

(Continued from Page One.)

aerodrome for the accommodation of persons who attend the meet.

Two young New England aviators, neither of whom was flying a year ago, made the first flights ever attempted over the city of Boston late Thursday.

Mr. Ovington, a former student at the Massachusetts Institute of Technology, and a native of Newton, Mass., made the first flight in his 70 horsepower Bleriot machine, leaving the field at 3:30 p. m. for Boston State House by way of Watertown, Cambridge and Boston harbor, and returning along the Charles river valley, a total distance of 32 miles, in 28½ minutes. He flew at an altitude varying between 2000 and 3000 feet. Coming and going, Ovington soared straight over the city, circling the State House dome before returning to Waltham.

While over the State House the aviator dropped a letter for Governor Foss inviting him to attend the meet, and another letter of like purport near city hall for Mayor Fitzgerald from the mayor of Waltham.

The other air trip was made by Mr. Atwood, who during the last two or three weeks has been flying a Burgess-Wright biplane, making a specialty of carrying passengers.

Apparently aroused by the example set an hour before by Ovington, the Lynn man, whose aerial base is at Squantum, climbed into the air from the aviation field there without notice, crossed Dorchester bay and South Boston, 2000 feet up, shot over downtown Boston, descended 1000 feet, circled the State House and the business district twice and finally made a straight cut to the aerodrome here, where he landed after circling the field several times, 15 minutes after he left Squantum at 5:10 p. m.

NEW YORK—Clifford B. Harmon has entered in the national balloon race, which starts from Kansas City July 10. This makes six entries. From this number the best two will be selected to represent America in the Coupe International, which starts from Kansas City Oct. 5.

RESTAURANTS MUST PAY, COURT DECIDES, FOR ASHES REMOVAL

After hearing in the supreme court today Judge Loring dismissed the petition for a writ of mandamus brought by Howard Marston, doing business as R. Marston & Co., proprietor of restaurants in Brattle, Cornhill, Washington and Devonshire streets, to compel the superintendent of public works to remove ashes from the restaurants.

By the ordinance of 1898 the city was to remove ashes accumulated from heating buildings and for domestic purposes, but the ordinance of 1908 changed the word "buildings" to "habitations" and added the word "cooking."

The city says it is willing to remove the ashes in the petitioner's restaurants on payment of the fee fixed by the ordinances. It was contended by Mr. Corbett, assistant corporation counsel, that the city should remove the ashes from dwellings and ashes accumulated from domestic purposes but does not remove the ashes from stores or commercial places like restaurants without the payment of a fee.

Daniel J. Daley, counsel for the petitioner, contended that the addition of the word "cooking" contemplated restaurants, but the court held that the ordinance clearly referred to domestic purposes, the word "building" having been changed to "habitations."

The court further said that the word "cooking" should be read with the words "and other domestic purposes" so that the ordinance was intended to exclude commercial establishments.

KEY DESCENDANT WEDS.

BALTIMORE, Md.—Dr. George H. Boylan, a native of Cincinnati, who served in the Franco-Prussian war under a special appointment from the French government, and Mrs. Mary Lloyd Key Gilmer, a grand-daughter of Francis Scott Key, author of "The Star Spangled Banner," were married here yesterday.

MISS SUTTON MEETS MISS SEARS IN FINAL OF WOMEN'S TENNIS

Los Angeles Expert Faces Boston Player in National Tournament on Philadelphia Courts.

THE MIXED DOUBLES

PHILADELPHIA—Miss Florence Sutton of Los Angeles, Cal., meets Miss Eleonora Sears of Boston today in the final round of singles in the women's national lawn tennis championship tournament on the courts of the Philadelphia Cricket Club and a hard-fought contest is expected as both are playing their best game at the present time.

Miss Sutton won her way to the final round Thursday by defeating Miss Adelaide Browning of New York in two straight sets, 6-3, 6-2, while Miss Sears secured her place by winning from Mrs. J. Warren of Boston, also in straight sets, 6-1, 6-3.

No matches in the women's doubles were played Thursday because this event has already reached the semi-final round.

The mixed doubles, however, witnessed some excellent tennis. Miss Hazel Hotchkiss, the national champion, and W. F. Johnson won by default in the second round from Miss Cassel and H. R. Von Wieder, but in the third round they had a great fight with Miss Sutton and A. D. Thayer. The summary:

CHAMPIONSHIP SINGLES.

Semi-final Round.
Miss Eleonora Sears, Boston, defeated Miss J. Warren, Boston, 6-1, 6-3.

Miss Florence Sutton, Los Angeles, defeated Miss Adelaide Browning, New York, 6-3, 6-2.

CHAMPIONSHIP MIXED DOUBLES.

Second Round.
Miss Hazel Hotchkiss and Wallace F. Johnson defeated Miss Claire Cassel and H. R. Von Wieder, 6-1, 6-3.

Miss Edna Whidley and H. M. Tilden defeated Miss Browning and C. B. Jennings, 6-3, 6-4.

THIRD ROUND.

Miss Hazel Hotchkiss and W. F. Johnson defeated Miss Sutton and A. D. Thayer, 6-3, 6-2.

Miss Edna Whidley and H. M. Tilden defeated Miss Browning and C. B. Jennings, 6-3, 6-4.

YALE ATHLETES BEST SCHOLARS

NEW HAVEN.—In the annual report of Dean Jones of Yale, which appears today, he says that the scholastic record of students engaging in athletics is above that of those who do not. He says: "College athletics and other student activities are sometimes supposed to have a bad effect on the scholarship of the participants. An investigation of the records of the members of the more important clubs and athletic teams proves the supposition to be incorrect."

"During the football season of 1910 but one member of the team exceeded his allowance for absences and that by a small margin, which was made good early in the following term. Other organizations are equally careful in the observance of the rules of the college."

OTTAWA EIGHT OFF FOR HENLEY.

OTTAWA, Ont.—The Ottawa Rowing Club's senior eight, which is to compete at Henley left Thursday night. The oarsmen, accompanied by 25 supporters, were cheered by thousands. Lord Stratford will entertain the oarsmen, and Sir Wilfrid Laurier and other Canadian cabinet ministers, who are in England for the coronation, will be present at the races on July 4, 5 and 6.

HAYNES CALLED TO PITTSBURG.

LOWELL.—Haynes, the former Lowell high school and University of Vermont pitcher, has been notified to appear at Pittsburgh after graduation this month. Maynes signed with the Pittsburgh management a year ago, and was farmed out to New Britain, Conn.

HARVARD FOORS GIVEN TRYOUT IN LIVELY BRUSH

Varsity Eight Will Have Fast Speed Trial Today or Tomorrow Should Conditions Permit.

RED TOP, Conn.—The Harvard oarsmen at this place have much of their practise still ahead of them, according to camp followers. Within two weeks of the annual regatta today, Coach Wray has not held a real time trial under favorable conditions. The race in which Harvard has figured as a loser this season is not considered a dependable test of what the crew's condition will be June 30.

Time trials over the full course of four miles are likely to be held for eights and fours tomorrow. The men expect to hit up the stroke in practice beginning next week. Also the workouts will be increased in duration, weather permitting. Coach Wray stated yesterday that he is satisfied with the outlook for his crews.

Adverse conditions kept the crews from time work Thursday evening. The morning practise amounted to only nominal paddling, none of the crews covering more than two miles, which was rowed late because of scholarship examinations.

The feature of the evening rowing was a race between the three four-oared crews, the first and second varsity and the freshman. The two varsity quartets started at Bartlett's Point and raced two miles, the freshman four picking them up at the mile and racing the last mile. The first varsity left the second, fully five lengths behind, but the freshman were beaten only a length.

The freshman and varsity eights started together at Bartlett's Point and rowed three miles against a heavy tide and wind as an endurance test, rowing back up stream after their three-mile drive. The stroke was kept close to 26.

Voorhees, coxswain of the varsity four, went to Boston for two days, and C. Abeles steered that crew.

COTTAGE PARK Y. C. ANNOUNCES RACES

The Cottage Park Yacht Club regatta committee has announced the program of its Yacht Racing Association open and interclub regatta, to be held off the clubhouse at Winthrop on the afternoon of July 1.

Nine classes are provided for in all—classes D, I and X of the Y. R. A. of Massachusetts, classes A, B, C and S of the Interclub Y. R. A. and two power boat classes. Cash-prizes are offered in each class. The yachts will sail over the regular course of the Cottage Park Yacht Club.

INTERCOLLEGIATE SHOOT ON.

In the intercollegiate shoot now being held, the Harvard rifle team made a score of 744. The contest does not close until tomorrow, but two other teams have already finished their shooting. Their scores were: Massachusetts Agricultural College, 701; Massachusetts Institute of Technology, 682. The individual scores of the Harvard team were as follows: Long, 140; Ayer, 130; Douglas, 122; Murdoch, 122; Bouve, 117; Carter, 119.

ELECT SWEENEY TRACK CAPTAIN.

E. L. Sweeney, class of 1912, was elected captain of the Mechanic Arts high track team at a meeting of the members held in the school Thursday. Sweeney has done fine work in the dashes and running broad jump, besides running well on the relay team.

HAYNES CALLED TO PITTSBURG.

LOWELL.—Haynes, the former Lowell high school and University of Vermont pitcher, has been notified to appear at Pittsburgh after graduation this month. Maynes signed with the Pittsburgh management a year ago, and was farmed out to New Britain, Conn.

SCHOOLBOY NINES OF GREATER BOSTON IN IMPORTANT MATCHES

Suburban League Will Furnish Two Championship Games Tomorrow, Which Will Affect Final Standing

OTHER CONTESTS

The schoolboy followers will have games plenty for tomorrow. Those which will excite the greatest enthusiasm will be played in the Suburban league series, Malden meeting Everett at Malden, and Melrose meeting Somerville at Medford. Both of these games should be keenly contested, as the league race has been one of the features of the schoolboy games this year, and the final standing cannot, even at this late date be predicted.

At Medford there is bound to be an interesting struggle, because if the home team loses, it will also lose the lead in the league to the winner of the contest, Medford taking third place as Melrose is playing Lawrence High at Melrose and the game does not figure in the standing. Everett, and Malden meeting Somerville at Medford. Both of these games should be keenly contested, as the league race has been one of the features of the schoolboy games this year, and the final standing cannot, even at this late date be predicted.

The Malden-Everett struggle should be as close as the first. Everett high has been doing very good work of late, but Melrose was the victor over Malden by only one run on Wednesday, indicating good play on the part of Coach Cuddy's men.

Murray of Everett has been doing excellent work, and will probably work for them and Queen, Malden's best man, will oppose him.

The annual game between the Dorchester high and Manchester (N. H.) high will be played on the Dunbar avenue grounds. Dorchester is confident of victory, but as the New Hampshire boys have made a good record against the teams in the nearby schools, Coach O'Reilly's men will not have an easy time.

Newton high, flushed with the preparatory league championship, will entertain Worcester Classical high. South Boston will journey to Newburyport and play the local school. Watertown high plays its annual game with the alumni, and the present schoolboys will have a very strong team against them as it is composed of many ex-college players, and boys who made good on independent teams after leaving school.

Salem high is down for a double-header. They are to play at Beverly in the morning and the afternoon they play Peabody on the latter's grounds. Beverly has the better team of its two opponents for the day, and they will do well to break even in the day's games.

Newton high is to play Chelsea high at Chelsea. Chelsea was beaten in its annual game with the Revere high team after a 10 inning battle, and Chelsea is out to win this game.

GOLF FIXTURES AT TEDESCO C. C.

The first golf tournament of the year at the TeDESCO Country Club at Swampscott will be held tomorrow. It will be a handicap stroke competition. One week later there will be a handicap versus bogey tourney. July 4 there will be a handicap stroke competition with special prizes for the best gross and net scores.

Beginning July 8 there will be weekly tournaments until Sept. 18. The club championship, the best eight scores to qualify for match play, will begin Aug. 19.

NEW WESLEYAN FRESHMAN RULE

MIDDLETON, Conn.—Freshmen at Wesleyan University will hereafter be barred from all intercollegiate athletic contests during the first half of their freshman year, according to a vote of the faculty Thursday afternoon. It is understood here that both Williams and Amherst are considering the matter also. The ruling will bar the first-year men from the football, basketball and relay teams. President William Arnold Shanklin is a strong advocate of the new plan.

DECIDES FOR CINCINNATI.

NEW YORK.—President Thomas Lynch of the National league today dismissed the protest filed by Pittsburg in the game of May 27, won by Cincinnati by a score of 1 to 0. In this game Wagner was caught between third and home on Hunter's hit to the infield. While Wagner was dodging back and forth Hunter slid into third. The ball was thrown to Third Baseman Grant, who touched Hunter and then threw home, getting Wagner. Both runners were called out.

OUTFIELDER FOR BOSTON.

PITTSBURG.—The announcement was made Thursday night by the Boston National league club that Jones, a Portmouth (O.) outfielder, had been bought and ordered to report here today.

Candidate for Crimson Infield Who Hopes to Play in Yale Series

PITCHERS LACKING

MR. PENROSE SERVES NOTICE OF FORCING A RECIPROCITY VOTE

WASHINGTON—Senator Penrose, chairman of the finance committee and in charge of the reciprocity bill, served notice on the Senate today that it would remain in session every day until a vote is reached.

Mr. Penrose also verified the White House statement that a careful canvass of the Senate showed 60 Senators in favor of the measure and more than that number against the Root amendment.

"It will be understood," continued Mr. Penrose, "that the tariff board has been hard at work investigating the wool schedule and will be ready to report next December. It is not reasonable, therefore, to expect that the Republican majority in the Senate will take up the wool bill until the tariff board report shall have been received."

Mr. Penrose announced that his committee would hold hearings on the free list bill at as early a date as possible.

A debate among Republican senators took place on Thursday over the effect of the Root amendment dealing with paper and wood pulp. Senators Lodge, Clark of Wyoming and Smoot all were on the floor and talking simultaneously. They agreed that that provision only restored the terms of the treaty as submitted to Congress.

"How, then, did that feature of the agreement disappear?" asked Mr. Smith of Michigan.

"As the whispering winds," responded Mr. Clark.

Mr. Smith was not satisfied, and demanded from Chairman Penrose an explanation of the disappearance of that feature from the bill. Mr. Penrose had adopted the policy of allowing the opponents of the measure to do the talking, and it was reluctantly that he arose to reply.

"The change," he said, "occurred in the ways and means committee of the House and the senator from Michigan knows as much about it as I do."

"The effect, then, is to give the Canadians free trade in paper and pulp and not to give it to us," commented Mr. Smith.

"And yet," he continued, "we are told by the House that we must not change a word in the bill, as it was passed there for fear of impairing it."

BOY SCOUTS PATROL GOING TO RIVERSIDE TO PITCH THE TENTS

The advance guard of the patrol of Boy Scouts of the Boston Y. M. C. A., which will be on duty at the first annual outing of the association at Riverside tomorrow leaves tonight to establish camp. The scouts, numbering about 50, are under command of A. C. Roberts, assistant scout master.

They will pitch the tents for the entire command on the recreation-ground across the river overlooking all approaches and will spend the night there. More than 10,000 tickets have been distributed by the association to its members for the outing and 2000 persons are expected to attend the baseball, athletic and aquatic events including the illumination of the river in the evening. A prize is to be offered for the best decorated canoe in the evening and it is open to all the canoes on the river.

The illumination of the clubhouse and canoe events will be conducted under the direction of the land and water club of the association. The officers for the outing were announced today at the headquarters at Ashburton place as follows:

Master of ceremonies, Frederick McIntosh of Nahant; referee, C. R. Moore of New England council, A. A. U.; inspectors in general charge, D. M. Cleghorn, director of social work; F. H. Caswell, assistant physical director; R. R. Updegraff, superintendent of training school, G. B. Emerson, judges, T. H. Russell, second, chairman social work committee, G. W. Vatcher, physical director of Marblehead Y. M. C. A., H. F. Dean and L. L. Silbert; timekeepers, R. F. Logan, Fritz Haas, J. F. Holmes; starter, H. M. Mosher, physical director of Boston Y. M. C. A.; scorer, H. E. Chamberlin; announcer, E. M. Shute, assistant director of social work; honorary referees, Arthur S. Johnson, president of the association; Jacob P. Bates, vice-president, George W. McHaffey, general secretary; Jesse S. Wiley, chairman of social work committee of the board of directors.

The outing is being held under the auspices of the department of social work and comes under the direction of the following committees: Board committee, Jesse S. Wiley, chairman; C. W. Perkins, Silas Peirce, Harold Peabody, director; David M. Cleghorn, assistant director; Eben M. Shute, and the members committee; T. H. Russell, second, chairman; H. E. Chamberlin, Ferdinand Hatchins, R. F. Logan, A. J. Marshall, H. G. Carell, Frederick Richardson, R. R. Updegraff, Leonard Martin, John Badger, R. R. Jackson, E. B. Garcia, R. F. Tufts, E. J. Abbott, C. Lothrop Higgins, W. R. Wilson and L. L. Silbert.

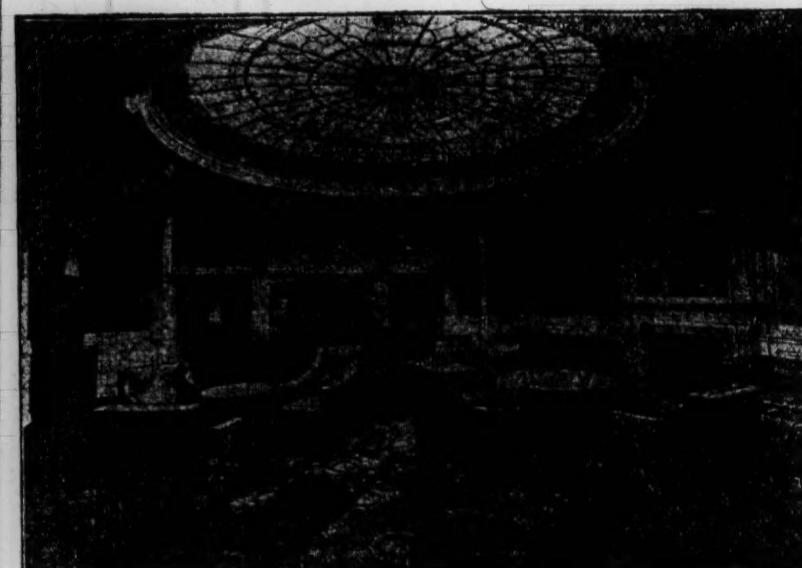

FERRO AWAITSENTENCE.

Judge Hardy of the superior court in East Cambridge will sentence next week Carmello Ferro of South Framingham, who was tried for slaying Antonio De Lellis in a boarding house at South Framingham. The jury recommended mercy.

CUNARD LINER'S CABIN QUARTERS FOR USE OF COMMERCIAL TOURISTS

Section of the "Lounge" on Cunarder Carmania, where a part of the time will be spent by voyagers during their transatlantic trip.

Drawing room on the steamship Carmania, showing richly furnished interior of the vessel that takes Boston party across the Atlantic.

COPPER CASE IS HEARD IN COURT

In the United States district court yesterday Olmsted gave a hearing on the objection of Charles M. Bruce, former president of the National Mining Exploration Company, to the sale of that corporation on May 25 last to the Iron Cap Copper Company. The properties of both companies are in Arizona.

Mr. Bruce conducted his case, J. P. Wright and O. W. Young represented the trustees in bankruptcy and George R. Nutter appeared for Nathan L. Amster, who loaned money to the company.

TORPEDO FLEET COMES FOR COAL

Wireless messages received at the Charlestown navy yard from the seventh division of the torpedo fleet this afternoon announce that the division, consisting of the Smith, Flusser, Lamson, Preston and Reid, will arrive at the yard for coal this afternoon. The vessels came from Provincetown.

FULL TIME AT TACOMA SHOPS.

TACOMA, Wash.—Full time will be restored at the South Tacoma shops of the Northern Pacific Company July 1. 7008 companies amounts to \$2,478,982.

STATE ROOM ARRANGEMENTS MADE FOR COMMERCE CHAMBER TOUR

State room plans for the Chamber of Commerce party, which is to sail for Europe on the Carmania June 17, have been completed and the state rooms assigned as follows:

BOSTON COMMERCE PARTY TO START FOR TRANSATLANTIC TOUR

(Continued from Page One.)

The party goes on an extended tour of European mercantile centers to study business and economic conditions.

In their 70-day itinerary the travelers will cover England, France, Germany, Belgium, Austro-Hungary and Switzerland.

The most important object of the trip is to make it possible for a group of representative American business men to see the best things that leading Eu-

PERSIAN-AMERICAN EDUCATIONAL SOCIETY BEGINS CONFERENCE

(Continued from Page One.)

ton University; Henry C. Finkelstein, legal attache of the Persian legation; Mirza Sinore Raffle of Columbia University, New York.

The object of the movement is said to be to improve everything that will tend toward advancing the progress of Persia and bring about a better understanding between the two countries. This includes increased commercial relation as well as aid in the material development of the ancient empire. The work of the society is said to be free from sectarian and religious dominance.

The society aims to establish branches for its work in all of the important cities of the East and the headquarters of the work will be kept in Washington, D. C., from which place it will send American trade catalogues and literature of all sorts to its branches in the Orient which may likely increase the commercial interests of the countries. In the American cities branches will be established with the object of securing greater interest in the improving of Persia's educational, industrial and commercial facilities.

The first public meeting of the society was held in the Garrison studio in Washington. Since then a branch has been established in Chicago and headquarters opened in Teheran, Persia, where the School of Tarbiat has by the assistance of the society been enlarged and improved in many ways. It formerly enrolled about 25 pupils, now it has nearly 400, exclusive of the girls' branch, which has lately been organized as a separate school with a modern program.

It is for the purpose of securing educational advantages for the Persian girls that the society is going to bring a number of young women to America each year so that they may get a broad education and go back to their own countries and teach in their own schools. Goodis Khanoum, the young woman who will be the guest of honor at the conference, will spend several years in Chicago, preparing herself so that she may become able to teach her own people when she goes back. It is expected that during the next year the society will bring over a number of others.

SECTION OF CARMANIA'S SALOON.

pean cities are doing in commercial, municipal and other economic fields.

A second object is to extend at first-hand an invitation to the governments and commercial bodies of European countries to send delegates to the international congress of chambers of commerce in Boston in 1912.

Special trains will convey the visitors in Europe, and automobiles will be at their disposal.

CHICAGO MEN START ON ROUTE OF FAMOUS RIDE OF PAUL REVERE

(Continued from Page One.)

ROURKE ASKS AWARD OF 10-YEAR CONTRACT FOR GARBAGE ALONE

An entirely new plan for the solution of the garbage disposal problem in Boston was proposed today by Louis K. Rourke, commissioner of public works, who now asks that a 10-year contract be awarded for garbage disposal alone at a cost of \$500,000 a year.

The previous plans, which have contemplated the disposal of both garbage and ashes, set the prospective cost at about \$3,000,000 a year.

The party is to leave for home tonight on a special train from the South station after the concluding banquet at the Hotel Somerset, over which George S. Smith of the Boston Chamber of Commerce will preside. Governor Foss of Massachusetts, Mayor John F. Fitzgerald of Boston, Governor Burke of North Dakota, Harry A. Wheeler, president of the Chicago Association of Commerce, Robert Luce of Boston, David R. Forgan, former president of the Chicago Association of Commerce, and Judge C. S. Cutting of the Chicago appellate court are to be among the speakers.

The party is to leave for home tonight on a special train from the South station after the concluding banquet at the Hotel Somerset, over which George S. Smith of the Boston Chamber of Commerce will preside. Governor Foss of Massachusetts, Mayor John F. Fitzgerald of Boston, Governor Burke of North Dakota, Harry A. Wheeler, president of the Chicago Association of Commerce, Robert Luce of Boston, David R. Forgan, former president of the Chicago Association of Commerce, and Judge C. S. Cutting of the Chicago appellate court are to be among the speakers.

His specifications will include a clause providing for ownership by the city, if it is deemed advisable, of any disposal plants that may be erected.

Under Mr. Rourke's plan, ashes and street sweepings would be disposed of by the city, as now, these being used to fill in the dumps. He said today that of the 467,120 tons of garbage and ashes handled last year, only 63,451 tons was garbage. He believes he can obtain a contract for handling this amount of garbage for \$500,000 a year.

The growth of the nation and all our activities are in the hands of a few men who, even if their action is honest and intended for the public interest, are necessarily concentrated upon the great undertakings in which their own money is involved and who necessarily, by every reason of their own limitations, chill and check and destroy genuine economic freedom.

"We hope to maintain the friendliest relations with Americans and we shall invite all foreign capital to come in; but there will be no more selling out of the country by piecemeal. We will invite competition; not monopoly. If American capital wishes to come here it must be prepared to compete with Mexican capital. No exclusive privileges will be given foreigners.

"What are known as company stores in towns where large numbers of men are employed will be abolished. This will mean that working people will have the benefit of buying from whom they please. Of course, we do not intend to question the right of concessions legally held, but we shall refuse to encourage or extend unjust ones."

"Undoubtedly foreigners, including Americans, who profited so greatly under the Diaz system, will be hard hit by the new era, but the determination to update Mexico and to improve the conditions of her poverty-stricken people will, I am sure, receive the hearty support of the great body of Americans."

Governor Gonzales said that beginning now the export duty on cattle shipped into the United States would be removed.

MEXICO CITY—From four widely-separated points in the republic came news of disturbances of a revolutionary character. The disturbances reported were in the states of Tabasco, Jalisco, Vera Cruz and Mexico.

GALVESTON, Tex.—The transports Kilpatrick and Summer sailed on Thursday with 2700 troops of the brigade stationed here several weeks ago. These troops will be taken back to ports nearest the posts where they were stationed when ordered to Texas.

ISSUE RULES FOR WIRELESS.

WASHINGTON—After July 1 ocean-going vessels carrying more than 50 passengers will be liable to a fine of \$5000 unless they are equipped with wireless apparatus. Federal rules governing wireless equipment are out today.

EMPIRE DELEGATES RAISE QUESTION OF STATE-OWNED CABLE

LONDON—Sir Joseph Ward, premier of New Zealand, and Sir Wilfrid Laurier of Canada spoke at the imperial conference Thursday on methods of securing a reduction of cable rates. Sir Joseph said that there was a feeling in the dominions that a ring governed rates, and Sir Wilfrid noted that the complaint centered chiefly on the Atlantic lines.

Postmaster-General Herbert Samuel supported a resolution looking to reduced cable rates throughout the British empire. After referring to the consent of the principal Atlantic cable companies to a reduction of 50 per cent for deferred despatches and expressing hope that, with the approval of the foreign administrations interested, new rates would shortly be introduced, he announced that steps were being taken to secure a reduction of press rates.

The following resolution was passed unanimously: "That in the event of considerable reductions in transatlantic cable rates not being effected in the near future, it is desirable that the laying of a state-owned cable between England and Canada be considered by a subsidiary conference."

QUICK DECISION ON SUBWAYS FOR NEW YORK COMING

NEW YORK—Activity of various reality organizations in Manhattan and the Bronx against the proposal of the McAneny subway report admitting the Brooklyn Rapid Transit Company to Broadway strengthens the impression that the Interborough company will oppose the terms laid down by the city's transit conferees rather than withdrawing its Broadway ultimatum and accepting the operating basis proposed by the report.

Notwithstanding these, however, Borough President McAneny, chairman of the joint conference committee, declares that, in his opinion, a final decision will be reached involving the acceptance of the city's offer by one company or the other, not later than June 29, which is a week from next Thursday.

Mr. McAneny intends to introduce a resolution at the special meeting of the board of estimate on Wednesday, contingent upon the acceptance of the report that the companies have one week in which to reply to the city's terms, and that if the terms are not accepted within the time the city will proceed with the Triborough.

BONILLA'S MISSION IS KEPT SECRET

WASHINGTON—Senor Policarpo Bonilla, once president of Honduras, and acknowledged friend of Zelaya, the deposed dictator of Nicaragua, is in Washington on business he evidently did not care to explain, for he evaded the government agents who had been set to watch him and appeared at none of the places where one may usually find a Central American gentleman bent on a political mission.

Soon after Bonilla arrived, the Central American colony heard that he had come as an agent of the Cientifico party of Mexico, to oppose the ratification of the Honduran loan treaty.

Other messages came through from Mexico saying Bonilla came representing Enrique Creel, minister of foreign affairs under Diaz; Jose Yves Limantour, the minister of finance, and other men of the Cientifico party.

JEWELRY MAKERS PLAN FIELD DAY

PROVIDENCE, R. I.—Jewelry manufacturers from all over New England will spend Saturday in an outing down Narragansett bay. It is to be the thirty-second annual field day of the New England Manufacturing Jewelers' and Silversmiths' Association.

The members and guests will go to Rocky Point, where a clam bake will be served. Two teams of the Providence amateur baseball league will play for the championship of the league at the Rocky Point grounds that afternoon for the amusement of the jewelers.

Arrangements for the outing are being made by Harry M. Mays, chairman of the committee, and Edward B. Hough and Ralph C. Thompson. The president of the association is George H. Holmes and William P. Chapin is secretary.

VOTE IN BAYONNE TO BE RECOUNTED

NEW YORK—Francis J. Swayze, supreme court justice, has ordered that the ballots cast at the election at Bayonne last Tuesday to decide whether the city should adopt the commission form of government shall be recounted tomorrow. Meantime the ballot boxes will be guarded by policemen.

The vote filed with the city clerk showed 2237 against the proposed plan and 2234 in favor of it.

MALDEN MAYOR TO VETO ORDERS

Mayor George H. Fall of Malden said today that he would veto the order for an appropriation of \$700 for an observance of July 4 on the grounds of economy. He also announces that he will veto the police order for one day off in eight for the same reason.

REAL ESTATE NEWS

Another big day for the sale of vacant land is expected tomorrow by the many brokers and operators who are just opening up new tracts or winding up the sale of house lots at properties which have been on the market for a longer period. One of the latest additions to the fine tracts offered for home sites is that of the Boston-Lowell Realty Company, known as Maplebrook park. This tract is located amid beautiful country scenery and is only a five-minute run on the trolley cars from Reading. Free excursions are to be run tomorrow and Sunday, leaving the North station for Reading at convenient times in both the morning and afternoons of these days.

ALLSTON SALE.

Henry W. Savage reports that he has sold the three-story cement and brick apartment house containing 12 suites of two and three rooms and kitchenette each, situated at the junction of Princeton avenue and Spofford road, and numbered 36 Princeton avenue, Allston. The lot contains 6975 square feet and there is a total assessment of \$40,000 on the land. The house is exceptionally well built and the suites well planned. The location is one of the best, being near the new Hotel Princeton on Commonwealth avenue. Joseph Shoolman conveyed to Arthur C. Lane, who bought for investment.

ANOTHER SOUTH END CHANGE.

John B. Jeffers et al have sold to Walter F. Gallagher the brick house with 1047 square feet of land at 10 Decatur street, South End, the total assessed valuation being \$5400, of which \$3300 is on the building and \$2400 is on the land. The purchaser buys for improvement. John C. Kiley of the Kimball building was the broker in the transaction.

BRIMMER STREET SALES.

The valuable residence property at 9 Brimmer street, facing the Charles river basin, West End, has just been sold by Carlton Humann to Joseph B. Ames, who buys for a home. The lot of land contains 3284 square feet, on which stands a four-story brick and stone dwelling, all assessed for \$30,000, of which \$14,800 is on the land. Codman & Street, Easton building, were the brokers in the transaction.

The same brokers have sold the property at 12 Brimmer street for Dr. Harold Dana to Mrs. Emma L. Street. It is the intention of the purchaser to lease the premises for a term of two or three years and later occupy as a home. The estate consists of a lot of land containing 2340 square feet, extending through to passageway in the rear, and a brick dwelling of four stories, all assessed for \$13,800, of which \$6400 is on the land.

IN BACK BAY DISTRICT.

The trustees of the estate of Elizabeth Brigham have sold 10,560 square feet of land on the southerly side of Westland avenue, Back Bay, to Harry Coleman, who buys for improvement. The property is assessed for \$31,000. R. Elmer Townsend, Shawmut Bank building, was the broker.

William H. Tucker has taken title from Henry W. Montague and Hugh D. Montgomery, trustees of the estate of Nathaniel Silsbee, to the two properties at 76 and 78 Huntington avenue, Back Bay, and has immediately sold them to Herbert F. Winslow, title coming through John W. Flynn. The former is assessed for \$35,500, and consists of 3285 square feet of land and a four-story stone apartment house. Of the total assessment \$10,800 is on the land. The estate at 78 is assessed for \$35,500 and consists of 3812 square feet of land and a four-story apartment house. Of this \$19,800 is on the land. The total assessment of the two properties is \$71,000. Wallace D. Dexter was the broker.

TODAY'S LOCAL SALES.

Dorchester real estate at 208 to 218 Columbia road, figures in today's local transactions, Gabriel M. Gordon selling to William E. Chase, et al. There are six brick structures and 8797 square feet of land, the latter taxed on \$5700, with a total assessment of \$13,700.

Elmer M. Bachelder has sold to Lillian J. Hesselwerdt the frame house and lot, containing 4500 square feet of land, at 95 Green street, between Alfred and Everett streets, West Roxbury. The estate as a whole is taxed on \$5700, with \$700 on the lot.

Eight steamers at anchor in the harbor were torn from their moorings by waves 25 feet high and much damaged.

A bark outside the breakwater and two other large sailing vessels near by were lost. Many fishing craft are known to have been destroyed.

Millions of dollars worth of damage have been caused, although the storm only lasted one hour. About 30 persons are known to have perished and over 100 are missing.

The storm has affected Venice and the Italian coast.

TRIESTE STORM PUTS MANY SHIPS IN MISSING LIST.

TRIESTE, Austria—This port has been damaged by a storm which swept the coast of Istria and Dalmatia on Thursday. One hundred vessels are reported missing, and the steamer Andromeda is known to have sunk.

Other messages came through from Mexico saying Bonilla came representing Enrique Creel, minister of foreign affairs under Diaz; Jose Yves Limantour, the minister of finance, and other men of the Cientifico party.

JEWELRY MAKERS PLAN FIELD DAY

PROVIDENCE, R. I.—Jewelry manufacturers from all over New England will spend Saturday in an outing down Narragansett bay. It is to be the thirty-second annual field day of the New England Manufacturing Jewelers' and Silversmiths' Association.

The members and guests will go to Rocky Point, where a clam bake will be served. Two teams of the Providence amateur baseball league will play for the championship of the league at the Rocky Point grounds that afternoon for the amusement of the jewelers.

Arrangements for the outing are being made by Harry M. Mays, chairman of the committee, and Edward B. Hough and Ralph C. Thompson. The president of the association is George H. Holmes and William P. Chapin is secretary.

VOTE IN BAYONNE TO BE RECOUNTED

NEW YORK—Francis J. Swayze, supreme court justice, has ordered that the ballots cast at the election at Bayonne last Tuesday to decide whether the city should adopt the commission form of government shall be recounted tomorrow. Meantime the ballot boxes will be guarded by policemen.

The vote filed with the city clerk showed 2237 against the proposed plan and 2234 in favor of it.

MALDEN MAYOR TO VETO ORDERS

Mayor George H. Fall of Malden said today that he would veto the order for an appropriation of \$700 for an observance of July 4 on the grounds of economy. He also announces that he will veto the police order for one day off in eight for the same reason.

BOWDOIN COLLEGE Y. M. C. A. CLOSING SUCCESSFUL YEAR

BRUNSWICK, Me.—The year just closing has been one of the most successful in the history of the Bowdoin College Christian Association. The membership this year has been 265, which is very nearly 80 per cent of the entire student body, and is also the largest membership the Y. M. C. A. has ever had.

The association has raised more and spent more in its work than ever before, the student subscriptions being nearly twice as much as last year.

At the usual Thursday evening meetings the average attendance has been 61.

The addresses of the college preachers in the Congregational church and association rooms have been largely attended. The cabinet will be awarded by Franklin W. Hobbs, chairman of the school committee.

Three grammar schools will hold exercises on June 26. At the Edward Devotion school graduation will be at 11 a. m. and Prof. Henry W. Holmes of Harvard will address the class. The Lawrence school will hold its exercises at 9 a. m. and Dr. David Sneden of the state board of education will be the speaker. The exercises of the Lincoln school will be at the evening and the children will have a program of their own.

The Pierce school will meet at 10 a. m. on June 27 and the Rev. Carroll Perry of Brookline will address them. At 3 p. m., the Rev. Dr. Dillon Bronson of Brookline will speak to the graduating class of the Runkle school. In the evening the Rev. C. P. Gifford will deliver the address to the graduating class of the Heath school.

CHILD WELFARE EXHIBIT OPEN TO BOSTON PUBLIC

To arouse public interest in child labor legislation an exhibit under the auspices of the national child labor committee was opened today at 5 Park street.

The exhibit, which is in charge of Miss Elizabeth McMurtie Dinwiddie, has been shown in 12 cities since last December, from Montgomery, Ala., to Madison, Wis., and as far west as St. Louis and has attracted wide attention. The exhibit is open from 10 o'clock to noon and from 2 to 5:30 o'clock daily.

One of the important reforms which the committee wishes to secure is a national bureau for the welfare of children.

PROVIDENCE BOY SCOUTS TO CAMP

PROVIDENCE, R. I.—Boy scouts are looking forward to the summer camp on Prudence island which is to open June 25. On that day 60 members of troops No. 1 and No. 2 will open the camp, and it is expected that after they return others will take their places for week camps.

One of the interesting features of the camp is to be special instruction in wireless telegraphy, an art that the boy scouts are taking much interest in here. A professional wireless enthusiast is in charge of that department of the boy scouts and will be at the camp on Prudence island with an outfit capable of communicating with the mainland.

WAKEFIELD TOWN MEETING CALLED

WAKEFIELD, Mass.—The selectmen have drawn the warrant for one of the most important special town meetings in many years. It will be held next Monday night. The most important question to be decided is the purchase of the north and east shores of Crystal lake for the installation of filter beds.

The land will cost \$6000 and the plans of the water board call for a filtration system costing \$25,000. Sentiment is developing in favor of entering the metropolitan water system, however, and it is possible that a committee may be appointed to investigate and that municipal ownership of Crystal lake as a water supply may be abandoned.

URGE BANKRUPTCY FOR TALC CONCERN

The American Talc Company of 22 Custom House street, which made a general assignment to Howard B. Knight of Brooklyn on May 22 for the benefit of its creditors, has been petitioned into bankruptcy in the United States district court. The company is incorporated in Arizona, and it is stated in the petition that it cannot pay its debts or carry on its business further.

The petitioners are George W. Benedict of Brooklyn, the Fisher Manufacturing Company of Springfield and the Colonial Can Company of Boston. The debts of the company are given as \$800,000.

A 2½-story frame house, standing on 633 square feet of land, numbered 42 Parkman street, West End, has just been purchased by the Massachusetts General Hospital, the grantor being Catherine M. Kimball. The total rating is \$2100, including \$1400 on the lot.

Another Dorchester sale involves the estate at 1 Lauriat street owned by Annie E. McNamara, who sells to Joseph D. McCarthy. There is a frame house and 3000 square feet of land, all assessed for \$2600. The land's share is 6000.

A lot of 5316 square feet of vacant land at Mascoma and Kineo streets, Dorchester, has passed to the ownership of Morris G. Rudnick et al, title being granted by Mary E. Hurley. The tax valuation is \$1300.

TODAY'S LOCAL SALES.

Dorchester real estate at 208 to 218 Columbia road, figures in today's local transactions, Gabriel M. Gordon selling to William E. Chase, et al. There are six brick structures and 8797 square feet of land, the latter taxed on \$5700, with a total assessment of \$13,700.

Millions of dollars worth of damage have been caused, although the storm only lasted one hour. About 30 persons are known to have perished and over 100 are missing.

The storm has affected Venice and the Italian coast.

PROVIDENCE CHAPTER GIVES PROVIDENCE MASON'S TRIANGLE

PROVIDENCE, R. I.—Fourteen Royal Arch chapters in Masonry have now had possession of the triangle, an emblem of the capitol rite, which was conceived by St. Patrick chapter of Toronto. Thursday night St. Paul's chapter of Boston, Edward H. Kavanagh, high priest, returned from Providence. While here, in the presence of 500 members of the order, he gave the triangle into the hands of Manton N. Coombs, head of the local chapter.

NORTHFIELD GIVES GOV. MEAD DEGREE

NORTHFIELD, Vt.—At the commencement exercises yesterday at Northfield University the honorary degree of doctor of laws was conferred upon Gov. John A. Meehan of Vermont, and the degree of master of arts on Charles H. Bradley of Boston, superintendent of the Farm and Trades school. The latter degree was conferred because of conspicuous service in the cause of education.

MORE OUTRAGES REPORTED.

LONDON—A despatch to the Chronicle from Constantinople reports a renewal by the Kurds of Armenian massacres in the Bitlis, Diabekr and Moush districts. The Armenian patriarch and deputies have protested to the minister of the interior, who has promised to punish those guilty of the outrages.

GERMANY NEUTRAL IN ALBANIA.

COLOGNE—The Gazette contains a Berlin despatch, which says that the German government will comply with Turkey's request in her note to the powers asking their influence in securing the strict neutrality of Montenegro on the Albanian frontier. Said the despatch: "While I was assistant to the attorney general I had occasion to look into this situation, and I found then that no plan had been proposed by the breadmakers which would bring them within the law."

HARVARD '01 REUNION IS TO BE A FEATURE OF CLASS DAY WEEK

According to the plans given out by the executive committee of the class of Harvard '01 today, the decennial reunion will be the chief among the graduate activities of class day and commencement weeks.

The celebration starts with a luncheon at the Hotel Lenox on Monday, June 26. From there the members of the class will parade in uniform, the design of which is now kept secret, to Copley square, from which they will proceed to Lewis wharf by special electric. A chartered boat will be in waiting to take them to Nahant. In the evening the class banquet and minstrel show will be held at the New Ocean house at Swampscott. Dr. Gerald Blake will be toastmaster. The show has been rehearsed for several weeks and it is expected to make a great hit.

The class will start Tuesday with a swim at Swampscott and the rest of the day will be spent in games and athletic contests at the Nahant Club. The first corps cadre band will follow the Harvard graduates on the entire trip.

On Wednesday, commencement day, the members will meet at the Lenox and march to Cambridge in a body, where their headquarters will be in a large tent near Holden chapel. Special arrangements have been made for '01 to vote in the tent for the five new overseers of Harvard University. Dinner will be served at the Lenox and the entire class will then march in full regalia to the Harvard Club "smoker" at Symphony Hall.

Thursday morning at 9 o'clock a parade from the Lenox to the Back Bay station will take place. A special train will await '01, '01 and '06 to take them to Westerly, R. I., where special trolley cars will convey them to Watch Hill. During the day a triangular field contest will be held, followed by a dinner in the evening.

On Friday the three classes will follow the morning races at New London in a special steamboat and the big races in the afternoon on an observation train. The three classes will again share a special train back to Boston on which dinner will be served in the evening.

The executive committee consists of J. W. Hollowell, chairman; James Lawrence, Jr., and Henry Hayes; committee on class day, chairman, L. J. Watson; committee on baseball, chairman, W. T. Reid; committee on receptions, chairman, James Lawrence, Jr.; committee on Swampscoot, chairmen, Joseph Proctor, Jr., and Robert Goodwin; field day committee, chairman, C. J. Swan; committee on insignia, chairman, C. F. Morse; commencement day committee, chairman, Charles M. Rotch; boat race committee, chairman, Gerald Blake; photograph committee, chairman, R. D. Swain; committee on publications, chairman, C. J. Swan.

Fifty original songs have been written for the celebration by E. L. Watson and set to popular music. Word was received this morning that W. K. Vanderbilt will follow the class on its wanderings.

WELLESLEY GIRLS HOLD FLOAT NIGHT PAGEANT ON LAKE

WELLESLEY, Mass. — The "float night" pageant of Wellesley College Thursday evening was witnessed by nearly 6000 people, including Miss Ellen F. Pendleton, president of the college, and Mrs. Henry Foyle Durand, widow of its founder.

An innovation was the christening of the freshman boat by Miss G. Marjorie Kendall of Hamburgh, N. Y.

"With spot lights brilliantly illuminating the waters of the bay between College and Stone halls, the "float" began at 7:30, when the picked college crew crossed the line.

There followed the senior shell bearing a yellow pennant, the junior crew with its red pennant, the sophomores with their blue pennant and finally the freshman crew bearing a violet pennant.

As the pageant of illuminated and decorated boats, 30 in number, started from the farther side of the lake the crews formed a star. Later the crews came together in the form of a W, and the students sang "Lake Waban," the class and crew songs and concluded with "Alma Mater."

Band concerts and fireworks display in the middle of the lake closed the ceremony.

Miss Anna T. Skinner '11, of Newark, N. J., received a loving cup as the most skillful oarswoman.

A reception was given in the Agora Society house on the Wellesley College campus Thursday afternoon to a large number of delegates to the Women's Trade Union League convention, now in session in Boston.

ESTRADA IN NEW ORLEANS. NEW ORLEANS—Juan Estrada, former president of Nicaragua, with members of his family, arrived here from Guatemala. After spending a few days here Estrada expects to leave for Washington.

NEW STATE FIRE MARSHAL HEAD. CHICAGO—O. A. Parker of Lansing, state fire marshal of Michigan, has been elected president of the State Fire Marshals' Association of North America.

Graduation exercises at the Greenleaf school were held Thursday.

The graduation exercises of the Quincy high school take place in the high school hall this afternoon. Diplomas will be presented to about 450 graduates.

MIDDLEBORO.

Of this year's graduating class of the local high school, Timothy Anderson and William Lang will continue their education at Dartmouth College and Miss Dorothy Snow will enter Bridgewater normal school.

The ladies' auxiliary of the Y. M. C. A. will hold a clam chowder supper and lawn party next Tuesday evening.

NEEDHAM.

The Rev. Newton Black of Christ church will spend August at his camp on Shepherds island, Northampton. The choir boys and a number of the younger men of the parish will be his camp guests part of the time.

The annual auto trip of the Board of Trade will be abandoned this year for a Nahant shore outing on June 26.

MALDEN.

Malden nest of Owls will be instituted Sunday afternoon in Ode Fellows hall with a charter membership of 500.

The freshman class of the high school has elected: President, Richard Hardwick; vice-president, Miss Ruth Ammann; secretary, Miss Adrian Perry; treasurer, Miss Doris Verbeck.

WAKEFIELD.

The high school battalion on Thursday elected Louis Laselle as drum major and this drum and bugle corps for next term: Buglers, Ralph Pitman, John Beebe, Melbourne Harlow, John Collins; drummers, Louis Laselle, Brenton Edgar, Robert Phipps, Frank Tredinnick, Ray Edgar, Clarence Fay.

DEDHAM.

The pupils of the eighth grade of the Ames school, accompanied by their teachers, visited the State House Thursday.

The Walnut Club has chosen: President, J. Henry Nay; secretary and treasurer, Charles A. Turner.

Next week is graduation week in all the schools.

The Rev. Dr. Willis O. Odell will preach at St. Marks church Sunday.

The vacation school will open July 5.

The newly-found cave was explored for over 100 feet, the interior being composed of tunnels and cross tunnels. In one room the height of the ceiling was 40 feet and stalactites adorned the overhead formation. On the floor of the cave was found an ivory spearhead five inches long, and a flint arrowhead.

GRANTS PASS, Ore.—Another marble cave was discovered recently in the southern part of the county by G. W. Walton, who was prospecting the hills for a limestone formation suitable for making Portland cement.

The newly-found cave was explored for over 100 feet, the interior being composed of tunnels and cross tunnels. In one room the height of the ceiling was 40 feet and stalactites adorned the overhead formation. On the floor of the cave was found an ivory spearhead five inches long, and a flint arrowhead.

MONTRAL LIGHT RATES CUT.

MONTRAL, Que.—Rates for electric lighting are to be reduced, according to the announcement of the Montreal Light, Heat & Power Company. The new rates will amount to 7½ cents per kilowatt hour on five-year contracts, instead of 8 cents for residential and 9 cents for commercial services at present.

SEATTLE, Wash.—The Hoquiam company of the Washington national guard has been ordered mustered out. Its place will be taken by cadets of the University of Washington.

LAW WORLD'S LONGEST UNDERGROUND CABLE, NEW YORK TO CAPITAL

NEW YORK—The longest underground cable in the world—nearly 250 miles—is to connect Washington, Philadelphia and New York. The American Telephone & Telegraph Company is now installing 135 miles of conduit between Philadelphia and Washington. New York and Philadelphia are already connected. The work will be done soon and the cable will carry a large number of telephone and telegraph messages in defiance of conditions, which in times past, notably during President Taft's inaugural, have completed isolated the national capital.

Designing and laying this cable is an engineering feat that is attracting worldwide attention. As many as 148 wires are contained in the sheath which forms the outer covering. This is termed a composite duplex cable. Every device known to engineering is employed to obtain the highest possible efficiency from the many strands of wire it contains. Seventy-four pairs of wires will be able to transmit simultaneously 99 telephone and 296 telegraph messages.

The engineers of the Western Electric Company, which makes all the Bell telephone apparatus, spent six months designing and testing this cable. Unusual attention was given to the testing feature so that no time might be lost because of possible defects after the installation had been started.

The cable is to be shipped on more than 1500 reels. The total weight is nearly 3000 tons and its shipment will require the use of 120 freight cars. The wires are insulated by 140 tons of paper rubrik, equaling more than 24,000 miles in length. The length of copper wire used in the cable is 20,000 miles, nearly enough to girdle the earth at the equator.

The weather was good enough to permit the boats to go around the cape, but it is understood that they had orders to put up at some place each night until they reach Gloucester.

Commander E. W. Eberly of the Atlantic torpedo fleet leaves Newport today in his flagship Castine, with the submarine tender Severn in tow.

At noon Thursday five of the little vessels were seen running along the surface of the water off Vineyard Haven. It is thought that they may have come up to recharge their batteries or give the men a chance to eat their meals in daylight. The other two under-water fighters were probably submerged when they passed this port.

SEE SUBMARINES ON NEWPORT TO GLOUCESTER RUN

VINEYARD HAVEN, Mass.—Off Bass river, a favorite anchorage for vessels waiting for daylight to go over the shoals, a number of lights were seen Thursday night, and it was thought probable that the division of seven submarines now on a run from Newport to Gloucester, might have anchored there.

The weather was good enough to permit the boats to go around the cape, but it is understood that they had orders to put up at some place each night until they reach Gloucester.

The new public service commission, appointed by Governor Bass Thursday and confirmed immediately by his council after a four weeks' deadlock, begins its work today.

The new board was named at a special meeting of the Governor and his council held at his home in Peterboro; the members are Edward C. Niles of this city, chairman; John E. Benton of Keene and Prof. T. W. D. Worthen of Dartmouth College.

For two weeks the state has been without a commission to deal with matters of public utilities, the railroad commission having been specifically abolished by the act of the last Legislature creating a public service commission.

Representative Raymond R. Stevens of Landaff was the nominee persistently put forward by Governor Bass whom a majority of the councilors refused to confirm.

The Governor had not before named a board with the name of Mr. Stevens left out and Thursday's appointees were unanimously confirmed by the council.

A few days ago there was a meeting of leading progressives from all parts of the state and the deadlock between the Governor and his council was thoroughly discussed. It was the opinion that the Governor should yield so far as the appointment of Mr. Stevens was concerned and Professor Worthen was Thursday named as the Democratic member.

The annual senior dinner is served in Goddard gymnasium, and this afternoon the seniors march to the quadrangle on the campus and to their places in the stands through rows of underclassmen, the other classes then taking places in the quadrangle.

The tree oration is by Joseph B. Morton of Somerville, and the class history by Charles Gott. The presentations to the under classes by the marshal of the day follow, the gifts being received by the marshals of the other classes—Arthur J. Anderson of South Manchester, Conn., for the juniors, Joseph E. Tosi of Revere for the sophomores, and Frederick W. Ford of Medford for the freshmen.

In the evening the glee and mandolin club are to give a concert and the Salem Cadet band will furnish dance music. The last affair on the class day program is the senior dance in Goddard gymnasium, which will last until early Saturday morning.

The committee from Tufts College in charge of the arrangements consists of Parker McColister of Detroit, chairman, Joseph F. T. Mann of Boston, Leonard S. Thompson of Malden, Carroll N. Whitney of Somerville and Russell P. Wise of West Newton. The Jackson College committee is composed of Mildred B. Sawyer of Malden and Gladys M. Baker of Provincetown.

PLAN TO IMPROVE KENYON COLLEGE

COLUMBUS, O.—After appointing a commission of five members of the church to investigate the affairs of Kenyon College at Gambier and report at the next annual convention, which will be held in Cincinnati in May, 1912, the Ohio diocese of the Episcopal church closed its sessions here recently.

The members of the convention declared that the school is too old fashioned and it will be made modern in every respect if the present intentions are carried out. There is also a movement on foot to reduce the number of directors, who now total 40.

WAKEFIELD, Mass.—Graduation exercises of the high school will be held in the town hall next Thursday evening. The valedictory will be delivered by Miss Mildred Hutchinson, the salutator by Miss Ethel Crandall and the oration by Allen Greenleaf.

Other honor essays or recitations will be given by Miss Edith North and Miss Esther Stewart, chosen by Principal Charles H. Howe and by Thomas Collins and Arthur Dignan, elected by the class. Miss Ethel Carlson is the author of the class ode. The reception to the teachers and parents will be held on the following evening.

CHICAGO SEEKS CONVENTION.

CHICAGO—At the meeting of the Presbyterian ministers of this city recently a motion was passed that an effort be made to secure the convention of the world's Sunday schools for Chicago in 1914.

WISCONSIN SCHOOL CONTRACT.

MILWAUKEE—The contract to erect the buildings for the new county school of agriculture and domestic economy in Wauwatosa, near the Watertown Plank road, has been awarded. The cost will be \$35,000 for a terminal site.

WHAT THE STUDENTS ARE DOING

WIRELESS STATION
PLANNED BY TUFTS
CLUB AS YEAR ENDS

The Tufts Wireless Club has completed its activities for this college year and is now making plans for next fall. It is now the intention of the members to install a station on the roof of Ballou Hall on College Hill. The station will cost about \$200 and messages may be sent 1000 miles. The Paulsen Arc system of transmission will be used, as under this, “secret sending” is possible and the sending radius is quadrupled. No station in New England has as yet been equipped with this system and the Tufts station will be unique among the stations of this section.

The club was organized May 2, 1911, with eleven members. H. J. Power, W. L. Kelley, J. A. Prentiss, L. K. Harlow, H. S. Ramsay, W. H. Torrey, P. F. Ayer, J. A. French, R. G. Stanford, H. H. Terhune and A. D. Stewart. Since the club's organization, one new member, T. A. Shea, has been received. The first regular meeting was held a week later and the following officers elected: President, H. J. Power; vice-president, W. L. Kelley; secretary-treasurer, J. A. Prentiss.

The club finding it impossible to install a station before next year, a series of lectures were begun, designed to fit the students for scientific work when it came time to install the station.

At the home of President Power in Everett the members have had a chance to do a little practical work. He has a station utilizing 100-volt current from the street mains, stepped up to a kilowatt. His transmission sets are of the latest type.

At the annual meeting of the Jackson College Student Government Association, the following officers were chosen for next year: President, Effie May Ritchie of West Somerville; vice-president, Etta M. Phillips of Lowell; secretary, Pearle E. Longley of Winchester; proctors, Jeanette I. Schofield of Boston, Edith M. Sanborn of Amesbury, and Lillian C. Smith of Kensington, N. H.

The students of the Crane Theological School at Tufts College met Thursday and organized the Ballou Club. The officers are: President, Vernon E. Blagbrough of Hanover; vice-president, Will C. Harvey of Newfane, Vt.; secretary, Horatio G. Mann of Rockland.

PRINCETON UNIVERSITY. PRINCETON, N. J.—The tutoring system at Princeton University has been highly developed with the result that a number of men have worked their way through the university tutoring, and the total sum earned by them for one year was \$14,000, according to a report issued by the Princeton Tutors' Association. This is an organization of undergraduates. Tutors get from \$1 to \$2 an hour and some of them have made \$16 a day and cleared \$1000 a year.

WOMEN LEAD IN CENSUS. LONDON—Further census returns show that there are 1,783,317 females in excess of males in Great Britain. The contrast would be less, however, if the soldiers and sailors now abroad were counted. Women continue to increase faster than men, as they have consistently since 1821.

LANNING FOUNTAIN
TO BE UNVEILED
AT NORTHAMPTON

NORTHAMPTON, Mass.—The Lanning fountain will be presented to Smith College and unveiled today. A meeting of the alumnae council will also take place and delegates from the local Smith clubs will be present. The annual meeting of the alumnae association will be held tomorrow in the lecture room of the Hellyer art gallery.

The collation will be held after the commencement exercises in the gymnasium Tuesday. There are four candidates for the A. M. degree at commencement.

The class of 1901 is expecting 130 members at its tenth reunion tomorrow evening. A picnic will take place Monday noon on the Allen field, and Monday evening the class will take part in the usual exercises on the campus.

The election of officers of the Cabinet Club resulted: President, Clarence E. Jones; vice-president, Paul Siggers; secretary, T. M. Robie, and treasurer, F. W. Dubois.

A fund for maintenance of the new telescope at the observatory has been given by R. P. Lamont '91 of Chicago.

H. Earl Hoover '12 E, Chicago, Ill., has been elected managing editor of the 1912 Michiganan. The Michigan daily has balanced publication for the balance of the year. Examinations are now on in all departments and will be for the next two weeks and one of the rules of the faculty will not permit the issuing of the daily during examination periods.

David Friday of the economics department has been selected by the state tax board to take entire charge of the statistical data that is being collected by the board. The board is trying to discover what will be the effect of certain proposed tax legislation.

The Gamma Phi Beta lodge has just broken ground for a new house that it is hoped will be ready for occupancy at the opening of college in the fall.

Allen A. Dudley of the vocal department will study voice in Italy; Dr. Walter F. Colby will study theory in Vienna, and Miss Frances L.

Financial, Commercial and Industrial News of the World

TRADING NARROW AND MARKET IS SOMEWHAT QUIET

Sentiment Continues Optimistic and Professional Bears Are Reluctant to Extend Commitments.

LONDON IS DULL

A narrow, quiet market prevailed during the early part of the session in New York today. Fluctuations of the leaders were unimportant for the most part. Some of the specialties were prominent but the trading in general lacked snap.

Sentiment continues good and as the crop outlook is favorable professional bears are not inclined to sell the market to any extent. In fact the shorts tend to cover on quick notice when stocks fail to decline when expected.

Steel was up a good fraction at the opening but soon lost its gain. Texas Company recovered 3 points of yesterday's loss at the opening sale. Rock Island preferred was a weak feature. The market was strong at the end of the first half hour.

The local market was steady. Opening prices were about the same as last night's closing figures.

Considerable strength was shown by the copper stocks during the first half of the session. Amalgamated opened up 1/2 at 70% and recovered before midday. Steel again improved, advancing a small fraction above the opening. St. Paul opened unchanged at 12 1/2, receded fractionally and then rose a point. The Readings issues were in demand and made good gains.

Advances were made by New York Air Brake, General Electric, American Steel-ming and Northern Pacific. U. S. Steel sinking fund 5s were in good request.

On the local exchange Utah Copper was among the most active stocks, advancing with other coppers and recovering its dividend before midday. North Butte opened unchanged at 34 and after selling off fractionally advanced a point. Lake Copper opened unchanged at 38 1/2 and advanced 1/2. Tennessee Copper opened up 1/2 at 42% and rose a good fraction.

Rock Island preferred opened off 1/2 at 67, but recovered before midday. Steel again improved, advancing a small fraction above the opening. St. Paul opened unchanged at 12 1/2, receded fractionally and then rose a point. The Readings issues were in demand and made good gains.

Stocks sagged off moderately in the afternoon. At the beginning of the last hour Steel was fractionally under last night's closing price. Many other issues lost their earlier gains. However, there was no particular pressure brought to bear upon the market.

LONDON—The stock exchange markets present a holiday appearance, many brokers being absent on account of the races at Ascot. The approach of the coronation also is checking business. Gilt edged investment issues are firm but domestic securities show the most vigor.

Americans are spotty and are now pausing after having advanced. Mexican railway issues are strong. The new Chinese railway loan is quoted at premium of 1 per cent.

Rio Tinto have improved 1/2 at 70%. De Beers unchanged at 18%.

THE COTTON MARKET.

NEW YORK—The cotton market opened steady, 3 points lower to 4 points higher: July 15.28@15.30, August 14.80@14.90. September 13.67@13.68, October 13.42@13.43. December 13.44@13.45. January 13.43@13.44, March 13.48@13.49, May 13.52.

LIVERPOOL—Spot cotton quiet, prices easier. American middling uplands 8.27. Sales 60000. Receipts 100, American 100. Futures opened barely steady, tenders new 2100.

THE WEATHER

UNITED STATES WEATHER BUREAU PREDICTION FOR BOSTON, MASS., FRIDAY, JUNE 16, 1911. Fair tonight, probably followed by showers Saturday afternoon or night; light westerly winds.

WASHINGTON—The U. S. weather bureau predicts wetter today as follows for New England: Unsettled local showers tonight. Saturday, except generally fair in southwest portion; warmer Saturday in west portion.

A disturbance central this morning over eastern Kansas is producing cloudy and unsettled weather with local showers from Oklahoma northward to Michigan. Pleasant weather prevails in the southern states east of the Rocky mountains. The temperature continues high over the cotton belt.

Conditions favor for this vicinity fair weather followed Saturday by increasing cloudiness and slowly rising temperature.

NEWS BY CABLE AND CORRESPONDENCE

PERMANENT BRIDGE OVER CANAL NOT TO BE BUILT AT EMPIRE

Project Reported One Time Favorably—Board Named to Consider Plan Recommends Abandonment.

NEED IS LESS NOW

Railroad That Was Expected to Profit Most by Span Changes Route and Cost of Structure Held Too Great.

CULEBRA, C. Z.—The board appointed to consider the erection of a permanent bridge over the Panama canal, and which, in November, 1910, made a preliminary report favoring the construction of a bridge of the high, fixed type at Empire, has reconsidered the subject, and has submitted another report and recommendation to the effect that the project be abandoned. The action of the board has been approved by the chairman and chief engineer.

In reaching its later decision, the board gave consideration to a number of developments that have occurred since the framing of its original report. One of these was the lessened necessity for a bridge to provide railway facilities. The survey of the Panama-David railroad, as made by the Panama Railroad Company, planned to have the new line cross the canal in the vicinity of Empire. This arrangement has since been changed by the Panama government, and it is now proposed, in case the road is built, to bring it to the Pacific slope outside of the zone line, connecting with Panama from this point by ferry.

Cost Too Great

Another reason that had considerable weight was the increased cost of a high level bridge, due to the increased amount of fill required to connect the east approach with the relocated Panama railroad. At the time the committee made its first report, no complete data were available on the isthmus, and a clearance height of 175 feet above minimum sea level was tentatively taken as the basis of the committee's calculations. Since then, a change has been made in the alignment of the relocated line around Gold Hill, which has removed the tracks further away from the canal in the vicinity of Empire. In addition, data received from various official sources, and from the different steamship lines and builders, both in the United States and abroad, indicate that a clear height of 175 feet would not be sufficient for the fixed wireless masts of the largest existing steamships, some of which would require a clear height of 112 feet.

Service Recommended

In order to give the people living west of the canal suitable means of communication, after rail connection over the canal is interrupted, the board favors the operation by the Panama railroad of an independent shuttle train service on the west bank, between a point approximately opposite Pedro Miguel, and as far north as the waters of Gatun lake will permit, the transfer of passengers and freight across the canal to be provided for by barge or ferryboat. The board also favors the construction of inclines to the 95-foot berths on each side of the canal at one or more intermediate points for convenient access by foot passengers, horses, carts, etc., so that the transfer at such intermediate points can be made, if necessary, at any time by small boat or barge.

COMMISSION TO SETTLE LIBERIA BOUNDARY SAILS

(Special to the Monitor.)

PARIS—Captain Schwartz of the colonial infantry is taking out a military commission to settle the boundary between Liberia and French Guinea and the Ivory coast colonies. The commission sailed from Bordeaux for Konakry, and it is hoped that its labors will put an end to all frontier difficulties, and give France an opportunity of opening up extensive territory in that region.

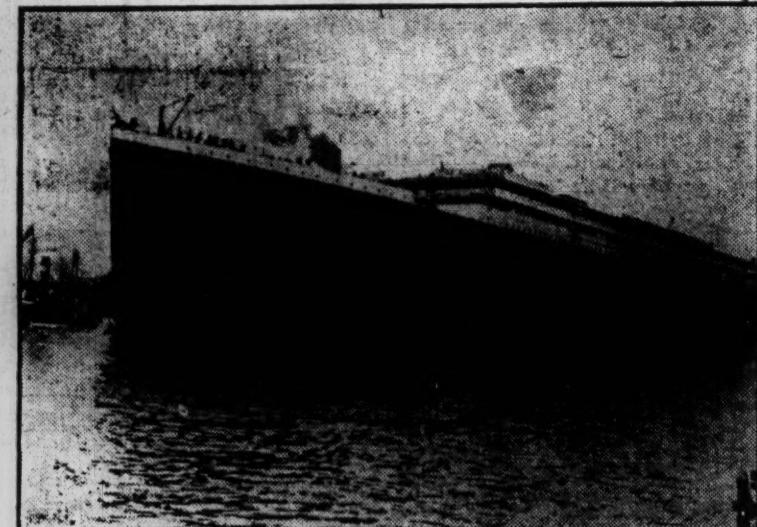

EXPECT PREMIER BACK ON JULY 11

OTTAWA, Ont.—Sir Wilfrid Laurier and the three cabinet ministers who are abroad, are expected to return to Ottawa about July 11.

Nothing can be learned here respecting the tenders for the ships of the Canadian navy. Only three people, the minister, deputy minister, and engineer commander, know what are the proposals, and they are all in England, consulting the admiralty with reference to them.

An announcement may be made there any time, but the contract will not be closed until the ministers return.

SHIP EXTENDS OVER 800 FEET IN WATER

(Copyright by Daily Graphic, London, used by permission.)

This view taken after launching of Titanic gives an idea of her length.

TITANIC GREETED BY HER SISTER OLYMPIC AS SHE LEAVES WAYS

All Ships in Belfast Harbor Blow Sirens and This Is Only Christening Ceremony for Huge New Ocean Liner

GUESTS ARE NOTED

Lord Pirrie, Chairman of Ship Building Company, Gives Personal Supervision to the Launching of Great Craft.

(Special Correspondence of the Monitor.)

BELFAST—The Titanic, the sister ship of the Olympic, has been successfully launched from Messrs. Harland & Wolff's yard.

With a tonnage of 45,000, 12,000 tons more than the Mauretania, the Titanic has a length over all of 822 feet 6 inches, breadth over all 92 feet 6 inches, height from bottom of keel to boat deck 97 feet 4 inches, number of steel decks 11, number of watertight bulkheads 15. There will be nearly 350 first class rooms with accommodation for over 750 passengers, and the number of second and third class passengers for whom accommodation can be provided is 1,650. The Titanic will be a triple-screw steamer having a combination of reciprocating engines with a low pressure turbine.

The launch took place under the personal supervision of Lord Pirrie, chairman of Messrs. Harland & Wolff, and among those present were Bruce Ismay, the chairman of the White Star line, J. Pierpoint Morgan, and others. The spectators assembled were roughly estimated at over 100,000.

There was no christening ceremony, the huge ship gliding down the talloweys into the water to the sounding of the sirens of all the ships in the harbor, which joined the Olympic, the sister ship, already on her way to Liverpool.

An interesting ceremony, which was attended by a large gathering, including many of the leading officials, both civil and military, marked the unveiling of that part of the work that has been brought to completion.

JIU-JITSU-TAUGHT TO BERLIN POLICE AS SELF-DEFENSE

(Special to the Monitor.)

BERLIN—The Berlin police authorities are introducing jiu-jitsu into the various corps with much success. Japanese teachers were at first engaged to instruct a number of police sergeants, who now in their turn have been imparting this art of self-defense to others.

It is chiefly in use in the corps of the secret police, those members of the force who on special occasions mingle with the crowd, wearing civilian dress. Twenty commissioners of police, the same number of sergeants and constables gave an exhibition of their prowess before a large number of distinguished guests, including several ministers of state and heads of various corporations. So unanimous was the approval and admiration of the practical method that it was immediately decided to arrange further classes on a much larger scale.

BELGIUM EXPECTS ELECTION.

BRUSSELS—In consequence of a great deal of discontent which has been excited by the government's education bill, it is thought probable that a general election may take place shortly; meanwhile King has summoned M. Beernaert, minister of state; M. Coorenman, president of the chamber, and M. Woesoe to confer with him on the subject of the bill.

Vessels on the business of individuals and companies at the Cristobal drydock when docked alone for the first day must pay \$40. On subsequent days the charge will be \$20 per day. Vessels docked with another vessel must pay \$40 for the first day \$40 and for subsequent days \$14 per day. At the Balboa shipyards and gridiron these vessels when over 125 feet must pay \$60 and under 125 feet \$40. No charge is to be made for lay days. At Cristobal drydock the minimum charge to be made will be for one day.

TORONTO, Ont.—As a preliminary to the possible extension of the Temiskaming & Northern Ontario railroad from its present terminus at Cochrane, Ont. (where it is crossed by the Grand Trunk Pacific transcontinental road) north to James bay, an exploration party under the direction of Professor Ellis of the school of applied science has left Cochrane for James bay with a view to examining the shore and selecting possible port on the northern terminal of the road.

For many years the province of Ontario has been desirous of having an outlet into this bay, but according to the best data heretofore obtainable, no suitable harbor has ever been located, the shore being shallow and not particularly adapted for navigation.

The party will also make a careful examination of the country to ascertain its possibilities from an agricultural point of view.

TORONTO, Ont.—As a preliminary to the possible extension of the Temiskaming & Northern Ontario railroad from its present terminus at Cochrane, Ont. (where it is crossed by the Grand Trunk Pacific transcontinental road) north to James bay, an exploration party under the direction of Professor Ellis of the school of applied science has left Cochrane for James bay with a view to examining the shore and selecting possible port on the northern terminal of the road.

The terms above stated supersede those of the agreement of Nov. 15, 1909, in which the Pacific carrier was given 70 per cent of the through rate, coal at cost at Balboa, and craneage and wharfage free; and a basic rate of \$8 per net ton on eastbound, and \$9 on westbound freight was established. By this agreement the contract might be annulled on 90 days' notice. When it was found that the cost to the Panama railroad of handling the freight was actually greater than the share it received of the total rate, the 90 days' notice was served by the government on Jan. 19, but the agreement was later extended until June 1.

Freight business by the Panama route has increased greatly since the opening of the service by the California & Atlantic Steamship Company in October, 1910; and within the last three months there has been a decided increase in the amount of freight from Europe for the west coast of South America. This rapidly increasing freight business is severely taxing the capacity of the Panama railroad box cars for the haul across the isthmus, and of the docks to unload and load it.

FIRST CONGRESS TO TALK LEGAL STATUS OF AVIATION IS HELD

Seventeen Countries Present Through 60 Delegates and a Code Considered Broad and Liberal Is Agreed on.

OFFERED AS MODEL

Every Aeroplane Must Have Proof of Nationality and Registration by Each Country Is Compulsory.

PARIS—The first congress of the International Legal Committee of Aerial Navigation has just been held at the Trocadero under the presidency of M. Millerand.

No less than 17 countries are represented by 60 delegates, the names of which include those of many distinguished international lawyers and others having special knowledge of aerial questions.

As the result of the congress the delegates after much discussion have agreed upon a code, the terms of which are regarded as broad and liberal. It consists of 17 articles, of which the leading features are that every aeroplane shall have on it proof of its nationality and shall always carry some document establishing its identity. Except in the cases of flights in private aerodromes, all airmen are to have their aeroplanes registered by some responsible organization, each country, however, having the right to make its own regulations as to registration within the limits of its own territory.

The model code further provides that there shall be published a complete list of all regulations: that airmen shall be forbidden to land at or near fortified places, the prohibited limits thereof being determined by the military authorities, and they shall be compelled to pay compensation for any damage caused by landing.

The congress has not, of course, any power to insist that the new code shall become law. It is regarded more in the nature of a model which all countries may adopt.

A proposal was submitted to the congress with the object of adding a clause that no explosive of any kind should be carried or used in time of war by any aeroplane, but was not accepted.

THE HOME FORUM

Painter Sees in Terms of Design

THE painter William Orpen has never visibly been troubled by one of the questions, at least, that embarrass so many painters: the question of what is legitimately pictorial, what is within the painter's purview; the vexed question, in short, of subject and sentimentalism. The possible rivalry of subject or anecdote with the proper business of the painter simply does not exist for him. Things have always struck him as design or color, or an action. If we were to discriminate among his pictorial preferences we might conclude that design interested him first, then color and then again the problems of atmosphere and light. This is not to say that he has not always shown a draughtsmanship, that is—well, draughtsmanship, and a distinct interest in the qualities of pigment. It is merely to express a general feeling that fine spacing, significant silhouette and rich gay color hold, among the outward symbols of his art, the most place in his affections.—The Studio.

Joy of Life

*It wakes in the throat of the woodland bird
In the rose-flushed hush of the morn,
It gleams in the gold of the billowing wheat
And the tasseled pride of the corn:
It follows the feet of beauty and love,
It stirs in the strength of the strong,
And its light leaps up on the trampling field
Where bravery battles with wrong;
It sings through each deed that is nobly done—
But sweetest, most undefiled,
It shines to the world in the world-old way
From the face of each little child.*
—Priscilla Leonard.

KITCHENER WHEAT IN AFRICA

IT has been the lot of many famous men to give their name to some articles of common use; thus we have Wellington boots, the Gladstone bag and the Wolseley valise. In this way Lord Kitchener's name has been made use of to describe the broad-brimmed tropical helmet, so well known in military circles, in addition to which the name of this famous soldier has been given to a certain variety of wheat.

Speaking at the Suffolk agricultural show, his lordship said that some of his hearers might be aware that he was a grandson of Dr. Chevalier, who introduced the celebrated Chevallier barley into England. While he himself was in India some of his ex-opponents among the Boers, who had since become his warm friends, wrote to him saying that their wheat in South Africa was affected by rust, but that they had heard that Tibetan wheat possessed certain properties which rendered it immune from this trouble. They therefore asked him if he could procure a sample of it for them.

It so happened that the Tibetan expedition gave him just the opportunity he required, and he was able to procure a dozen sacks of Tibetan wheat, which

"The fear of the Lord is the beginning of wisdom." Love is the fulfilment thereof.—Jean Nicolas Gron.

KNOW THYSELF

ONE of the serious faults of humanity is the lack of proper self-knowledge. Although such knowledge is the basis of enduring independence and strength for some reason one finds comparatively little inclination towards earnest effort in self-examination. Consequently there is often found but little individual ability to distinguish between the character or selfhood which is actually natural and those foreign or illegitimate attributes which have been attached to personality but which are really unnatural. Nevertheless, like charity, wisdom and judgment must begin at home (within individual thought). Shakespeare may have been severe, but he outlined the only possible course when he said: "To thine own self be true . . . thou canst not then be false to any man."

No doubt many people believe they thoroughly understand their own nature as to their abilities and their shortcomings yet it is a fact that no one can afford to accept the conclusion that he is doing himself justice and actually expressing his real nature in all its possibilities of progress unless it is his habit to devote time and energy to reflection from the rush and stress of human affairs and to candid inquiry into his own motives, aims and thought processes. Such honest investigation is invariably an important element in the process of real success. It is the step by which the individual must come into harmony with the Truth and power of his real being, and which unfolds in him an appreciation of life which accredits him with the pure spiritual manhood that is his by nature and permits him successfully and finally to resist and cast off that which is neither natural, useful nor good.

Relative to this important subject Christian Science brings a message of hope and inspiration to the world that is applicable to all alike. It bids them undertake this self-examination and happily furnishes the key for the solution of the problem. This key is the statement that the only natural selfhood in any case is that which in ability and grace is the image and likeness of a good God. All that is degrading, impure, disordered or limiting, Christian Science declares to be unnatural and urges that it be so recognized and thus neither feared, admitted nor expressed. This message of the Christ comes "not to destroy, but to fulfil," that is to unfold a complete manhood in all that is good and to effectually deliver mankind from all evil.

Perhaps one of the commonest reasons why this inquiry, fraught with highest promise as it is, ordinarily gains comparatively little attention is that the first steps are apt to be beset by the distressing suggestions of self-condemnation on the one hand and personal self-justification on the other. Both these states of consciousness are excluded when the message of the Christ is admitted and one is the gainer thereby. In the process of self-recognition demanded by Christian Science neither mode of thought is tolerated. Yet whatever may have deterred one from turning thought within to "search his way" it is inevitable that mortal dissatisfaction

coupled with that insistent hope for a larger life that "springs eternal in the human breast" will bring each one at length to an honest recognition of that which he has been wont to call or express as self and will impel him to struggle to manifest a better and purer self. If in this attempt to understand himself he is confronted with the subtlety and obscurity of human thought he will also remember that many another earnest thinker has pointed the way of progress. It was many centuries ago that David the Shepherd King of Israel sang, "Who can understand his errors, cleanse Thou me from secret faults," and the necessity of spiritual inspiration and guidance is still felt by those who would find their freedom in the only possible way, namely that of self-recognition and perfection.

In honest examination of thought and deed one is often amazed at that which he finds to have been plaidly admitted as natural and almost habitually expressed but which is wholly undesirable and is readily eliminated as the truer nature is recognized and permitted to unfold in conscious activity. The true idea of man in his relation to his divine Principle, God, enables one to realize that all this which thus drops away was never actually natural to nor a part of the individual no matter how much employed and that the spiritual nature in all its perfection, wholly good and unimpeded in its ability, still remains at all times ready to be expressed. Because there is no condemnation in this process of thinking one finds place for neither remorse nor sorrow but humbly and gratefully attends to the real business of manifesting unlimited manhood which gives neither place nor power to that which is unlike God.

The scientific explanation of manhood is very simple, namely this: That as man is created and controlled by an unchangeable divine Principle, the actual nature of man is wholly good. In the text-book of Christian Science, "Science and Health with Key to the Scriptures," page 294, Mrs. Eddy has written: "Man's genuine selfhood is recognizable only in what is good and true. Man is neither self made nor made by mortals. God created man." To test the value of this statement one has only to adopt the standpoint and begin to recognize as self only that which is good and he will find that each day unfolds new fields and means of satisfactory self-expression. Indeed one may find himself at times assuming almost the position of an onlooker who only expects and attends the manifestation of the ideal and rejoices when he recognizes it in word or deed.

True self-knowledge is the key to individual success. With it one instinctively appreciates the good and expects to find it at all points. Without it one cannot hope to fulfil the command of the master, "Love thy neighbor as thyself," for the qualification of the command will be improperly fulfilled. In a word one must find oneself worthy to be loved and fear neither to express this self nor to treat it with due respect. This recognition and it alone can and will satisfy the demands of Christian endeavor.

PAINTS FOR THE JOY OF THE WORKING

THAT Mrs. Sydney Bristow is a woman busy with many engagements and family duties and snatching time for painting from the rush of a society woman's life is something that one finds hard to believe, looking at the reproductions of her splendid work in the Studio. The writer of the article tells how he met her first at an afternoon where there was music. He remarked to a charming young lady next him—author of certain witty parlor plays as he knew—that the singer who had just finished a good song was fortunate in

his accompanist, who seemed to feel the music. The young lady said that the player was her mother. Then the gentleman met Mrs. Bristow and had some gay chat about pictures and books without suspecting that the lady had ever touched a brush.

A week or so later he was invited to luncheon with Mrs. Bristow and entering her house was impressed by the beauty and harmonious rightness of the pictures during his quick passage to the drawing room. He remarked spontaneously to his hostess that he had never

been in a house before where all the pictures were right and delightful. The lady answered smiling that she had herself painted them all.

Here is the artist life at its best, one would say, a woman living her normal life in the world, painting her pictures because she loves to, not with the public approval in eye at all. It approaches the "each in his separate star" ideal of Kipling, when we shall all do the things we love to do for their own sake and not with any selfish end of financial return or fame.

School Gardens Outdoor Classrooms

One of the biggest mistakes of the average educator is the notion that the more hours a child daily gives to its book studies the more it will learn. The reverse is often true. To add gardening to the already overcrowded curriculum will seem to many a hardship, but it will in reality be a recreation. "When gardens come to be a part of the school curriculum, a very large percentage of the nature study now done indoors will be done outdoors," writes Dr. M. L. Greene, in her valuable book, "Among School Gardens." "Everywhere that the garden has been introduced in connection with the school, the universal testimony is that it stimulates the child to better intellectual grasp of his studies. Even where it has been added to the routine of the school, the teachers say the time required is a welcome break that is more than made up by the vim and expedition with which the pupils attack their other work." "The dullest child will brighten as he lays out the little plot, figures out the crops, or calculates the gains." In the words of a Canadian writer: "The garden is becoming the outer classroom of the school, and its plots are its blackboards." —New York Post.

Teaching Them How to Soldier Well

Woman can climb no higher than womanhood whatever be her title.—Lucy Larcom.

Contentment

Sweet are the thoughts that savor of content;
The quiet mind is richer than a crown;
Sweet are the nights in careless slumber spent—
The poor estate scorns Fortune's angry frown;
Such sweet content, such minds, such sleep, such bliss,
Beggars enjoy, when princes oft do miss,
The homely house that harbors quiet rest,
The cottage that affords no pride or care,
The mean, that 'greets with country music best,
The sweet consort of mirth's and music's fare.
Obscured life sets down a type of bliss;
A mind content both crown and kingdom is.

Industrial Progress for Women

When Harriet Martineau visited this country in the middle of the last century she found that only seven occupations outside the home were open to women. According to the last census there are not seven occupations possible to men in which women are not earning a living in this country.

PUEBLO OF LAGUNA, NEW MEXICO.

Lowell Boasts Colony of Hellenes

APPARENTLY the Greek has flocked in considerable numbers to the vicinity of Manchester, for I noted on the railroad bridge at Goffstown, some eight miles away, a big signboard warning in two languages against entering upon the railroad tracks at that point, says a writer in the Lowell Courier-Citizen.

The first language was English. The second was Greek. All of which reminds me that there's a most interesting book on the Greek immigration to this country, written by Henry Pratt Fairchild, which deals especially with our local colony of Hellenes.

It is worthy of remark in passing that it sets down the Lowell colony as "probably the most exclusive and distinctive Greek settlement of any considerable size in the United States."

Watering Flowers

The window of a florist in New York city demonstrates the practicability of watering plants, when people shut up their apartments and go away for days at a time. A large tin pail of water stands on the table about four feet from the floor. Hanging over the edge of the pail are strips of muslin varying in width from one to three inches. The strips of muslin are firmly anchored at one end inside the pail by means of weights, while the other end rests on the surface of flower pots which are arranged in a circle around the table. The water soaks slowly through the muslin into the earth of each flower pot and keeps it at a uniform moisture. The width of the strips varies with the size of the flower pot. In the windows above mentioned the pail supplied the flowers with water for a week at a time.—Buffalo Commercial.

Back From Egypt

A Detroit new millionaire, back in New York after his first trip abroad, met Otto Carmichael in the Waldorf-Astoria. "Well," said the new millionaire, bursting to tell somebody, "I'm back. I've been to Egypt!"

Carmichael, apparently, was not annoyed at this information.

"I've been to Egypt," persisted the Detroit. "Had a hard time, too. Awfully hot and dusty over there."

"Yes," said Carmichael, as he moved away. "I understand Egypt isn't giving very good satisfaction this season."—Saturday Evening Post.

Remarkable Documents

Last month, for the first time in nine years, the original copies of the Declaration of Independence and of the constitution of the United States were taken from the archives of the state department at Washington and looked upon by a few officials. The constitution is in a good state of preservation, but the declaration has suffered sadly from the ravages of time, and especially from the process of copying to which it was subjected in 1852. Even the famous bold signature of John Hancock is now barely legible. Both of the precious documents are most zealously guarded, and have not been open to public inspection for many years.—Youth's Companion.

THE CHRISTIAN SCIENCE MONITOR

"First the blade, then the ear, then the full grain in the ear."

EDITORIAL

Boston, Mass., Friday, June 16, 1911

East and West

FROM July 26 to July 29, inclusive, there will be held in London, Eng., a universal races congress, the first in the history of the world. Today and tomorrow there will be held in Washington, D. C., the annual conference of the Persian-American Educational Society. This will be the last meeting of that body under its present name and limitations. Hereafter it is to be known as the Orient-Occident Unity Association. The Washington and London gatherings have one great object in common—the bringing together of the East and West. The universal races congress has the support of thirty presidents of parliaments in all parts of the globe, of a majority of the members of the permanent court of arbitration, of the delegates to the second Hague conference, of twelve British governors and eight British premiers, of over forty colonial bishops, of hundreds of professors of international law, and of learned men in all countries. In the program arranged for the Washington conference appear the names of many eminent American men and women and of some distinguished foreigners.

It will thus be seen that what J. H. DeForrest regards as the greatest international problem of the twentieth century—how to get the populous and historic east into sympathetic relations with the aggressive west, so that the two halves of the human race may make one fairly peaceful whole—has already been brought forward for serious discussion under excellent auspices. The London congress proposes to take up the question of race in its widest possible aspects. The immediate object of the Washington conference is outlined in that of the association—to establish closer relationships along all lines between the people of the east and west; to create a better mutual understanding and international fellowship among the citizens of the world; to uphold the beneficial laws of peace and arbitration between different nations—in short, to cultivate a better acquaintance and a clearer understanding between the two great branches of the human family than now exists, than has ever existed. The law of separation between the races has come down to our period from the ages. Kipling has voiced it in the lines—

For East is East and West is West and never the twain shall meet
Till earth and sky stand presently at God's great judgment seat—

and it has come to be taken for granted by millions as a fixed and indisputable and insurmountable fact. But modern thought is opposed to this theory. Tremendous advance has been made in an opposite direction even within the last score of years. A great light has broken in upon the Caucasian, for instance, as to the intellectual capacity of the man whose skin happens to be of another tint. Not only individuals, but nations, are now being judged, not by origin, race or custom, but by their achievements, upon their merits. In both the London congress and the Washington conference efforts will be directed toward showing the enormous debt of western society to the east. In both gatherings facts will be brought forward with the view of showing how unjust, how foolish it is for a single wing of the human race to attempt to claim a right to, or possession of, all the credit for the world's advancement.

The hope of the present, the hope of the future, is that "the twain" shall meet—not in some far off, remote time or place, but here on this earth—and that they shall meet in high appreciation and recognition of each other's worth, in friendship, fraternity and peace.

THE firearms manufacturers have contributed \$25,000 toward the support of the National Association of Audubon Societies. This looks like ammunition well spent.

Profit Limiting

JUDGE GROSSCUP of the United States circuit court of appeals, like the late Justice Brewer of the supreme court, never has been obedient to the tradition that judicial officials should not participate freely in discussions of public policies. The Chicago jurist may be counted upon to express his opinion fully on whatever has to do with legislation affecting business methods and ethics, whenever he is given an audience worthy of the speaker and his theme. Hence it is not surprising to find him using a commencement address at the University of Iowa for discussion of a new method of dealing with trusts in the light of recent supreme court decisions.

With the practical and constitutional difficulties of his scheme for differentiating between businesses, according to their area of operation and their size, it is not our desire at the present time to deal. The point to be noted now is the length to which his admitted partial support of the "new nationalism" carries this jurist in advocacy of the limitation of profits to be derived by investors, however law abiding they may be. Here is reflected a tendency, sweeping a varied aggregate of citizens into it, which is fundamental in its nature, and which explains many of the surface phenomena of reform movements of the day. The historic British and American point of view has been that, given compliance with law and conformity to the code of business ethics governing payment of debts, truth telling and pledge keeping, it is not the function of society to inquire of a man or a group of men engaged in business what is the ratio of profit to investment. Inequalities of reward corresponding to inequalities of capacity for business legitimately conducted have been expected.

Such prescriptions for federal supervision and regulation of business profits as Judge Grosscup and other leaders of public opinion are now proffering indicate a considerable departure on their part from this former standard, and much contemporary legislation points in the same direction. Immediate economic results and the changes in political structure that are involved are more apparent than the reconstruction of human nature which such a program implies if it is to be permanently effective. This immediately raises the query whether the largest group of persons to be affected by this proposed extension of state authority has come to have definite convictions as well as clean-cut opinions about limitation of profits? Until they have, legislation and executive mandates will hardly be very effective.

THE first election held in any part of Canada since reciprocity with the United States was accepted by the Ottawa government as an administration measure was that which resulted in a victory for the Liberals in Nova Scotia on Wednesday. Whatever explanations the opponents of free trade between the two countries may have to offer, the fact will remain that in Nova Scotia the proposal stands approved. The figures appear to be conclusive as to the state of public sentiment in a province which would suffer severely, so the foes of reciprocity held, by the operation of the terms of the trade agreement. The Liberals have carried twenty-seven of the thirty-eight seats in the province. Halifax elects three Liberals, with a majority for the highest of 1056 and for the lowest of 705. In Cape Breton, where much capital was made of the coal clause in the agreement, and where the Conservatives expected to elect four of their candidates, they succeeded in electing only two.

The Murray government did not get through without losses. Three of its members were defeated, and the opposition will have a slightly improved standing in the Legislature. But this does not affect the main proposition. During the campaign the fight was made directly on reciprocity, for which the Liberal party stood solidly, and the Liberal party and reciprocity have won.

This is gratifying in no mere partisan sense, but only as it indicates that the real sentiment of Canada, like the real sentiment of the United States, is for closer social and trade relationships between the two great English-speaking countries of this continent.

THE President of the United States, the King of England and the Governor-General of Canada at times wear cotton suits, and the South is wishing that the whole world would follow their example.

Shipping Bananas to England

EUROPEAN taste for American tropical fruits has been so decided of late that a leading United States concern is now arranging to increase its steamer service with a number of vessels fitted especially for conveying the products in good condition to the transatlantic markets. This company, which is already a recognized factor in the tropical fruit business between Jamaica and the United States, has decided to take three steamers from the New Orleans-New York service and instead to place them in commission between Central America and England. Jamaica will be a stopping place merely to take on passengers. Otherwise, the West Indian islands will not enter into the scheme for facilitating shipping between America and Europe. The Jamaica-Boston service will continue as at present; so will the service between Jamaica and New York.

With the demand for fruit on the increase abroad, and the companies engaged in the business proposing to develop export to Europe, there should be great benefit to Latin-American countries which, in some respects, depend as yet on fruit raising as a chief source of income. It is also to be noted that cold storage facilities have reached a state of perfection whereby the banana can be put across the ocean without deterioration. The service between Central American ports and the north is to a large extent equipped with refrigerating apparatus. As contrasted to earlier methods, the new way is decidedly the better.

Stearns that will enter the Costa Rica-Southampton service have each a capacity of 60,000 bunches. The most interesting fact is, however, that the American company sees an opportunity to extend its trade, and this may encourage the republics to the south to devote their agricultural energy more and more in the direction of producing on a larger scale an article for which there seems to be an unsatisfied demand. It is not to be doubted that in time a banana will be as common in the London market as it is on this side of the ocean.

The first schooner load of bananas that ever came out of the tropics arrived from Honduras just fifty years ago. About three years before Joshua M. Cromwell, known as the "father of the banana trade," who saw the first bunches brought north by passengers from Jamaica, realized that a lucrative business awaited development. Several attempts were made to bring the fruit to the United States, but they were unsuccessful until Mr. Cromwell sent Capt. Lorenzo Baker to the island. There was no money in the business until Mr. Cromwell discovered a process for ripening green bananas. This was the beginning of an industry which has proved immensely successful in America, and which promises to duplicate its success abroad.

APPEALS from Australia and from Russia for expert advisers and engineers have recently come to the reclamation service of the United States. The experts are wanted to devise ways and means for making desert tracts blossom and bloom in those remote regions after the manner of the transformed areas of American territory that have been redeemed and made fruitful surpassing the wildest dreams of visionaries of a generation ago. Now it is announced that an expert, similarly trained, is to be sent to China by the American Red Cross Society, to aid in curbing and storing the waters of the streams that flood vast areas of territory, occasioning great loss through the flood itself or the ensuing famine. The Red Cross Society believes it is more economical to subsidize a skilled engineer adviser than it is to respond to the recurring calls for funds; and it is right. If Chinese officials will only cooperate, great waste of lives and property can be stopped.

With Afro-Americans trained at Hampton and Tuskegee aiding German administrators in South Africa to develop the cotton-growing capacities of that region, with American administrators and accountants now straightening out the tangled accounts in San Domingo, with Americans sitting at the receipt of customs in San Domingo, and with American irrigation experts busy serving Russia and China in Asia and Australians in the insular continent of the South Pacific, it is evident that wider field of activity and service of humanity opens out before Young America today than ever before; and that he is to enjoy privileges and develop qualities that have been characteristic of world-circling British administrators for centuries. But he will go as a teacher and not as a ruler, and as such will meet with a welcome often lacking to him who comes armed with power based on physical force.

Nova Scotia Again Goes Liberal

ADmirable and necessary as are the many social and entertainment features of such hospitality as Boston's Chamber of Commerce has shown to the large delegation from Chicago's similar organization this week, they rank second to the opportunities for more serious things afforded by the event. Travel educates, whatever the nominal motive for a change of base. Opportunity to see achievements in industrial, commercial, transportation and governmental activities and to listen to authoritative explanations of the methods used in winning success, must stimulate thought, provoke reflection and inspire action similar in kind and aim. Moreover, there is the perennial value of informal and unrestricted conversation with informed and generously disposed men, strangers hitherto perchance, but avid for light on the same problems and eager to compare notes and to gain new ideas.

Taking advantage of such opportunities as these, visitors and hosts alike are carried beyond any provincial view they may have had previously, and are made to see the existence of common problems and the possibility and desirability of constant comparison of views. Thus a feeling of interurban amity and comity is born. The ideal of friendship between communities becomes a vision to which practical form is to be given later. Then naturally follows the effort to provide for such recurring annual gatherings and interchanges of opinion as will make cooperation easy and normal. Thus interpreted, such an event as Boston has recorded this week takes on much importance.

What more natural than that there also should grow out of such closer affiliation of the business men of the two cities a plea, voiced by the president of the local Chamber of Commerce, for an effective national federation of all organizations of business men, whose officials might be enabled to speak with collective authority when action is proposed or is taken at Washington that in any way concerns the interests represented in such an organization? Europe, as President Smith said, is far ahead of the United States in this respect. Consequently her fiscal, tariff, transportation and taxation policies are far less the product of partisan scheming than such policies are here. Legislation is less in volume and higher in quality. If a new national organization of this kind is created later, and if it can find a way to voice accurately the sober judgment of its constituency, it is needless to say that its verdict will weigh heavily.

Boston next year will entertain the international congress of chambers of commerce. She will expect Chicago to aid her in extending hospitality to delegates from Europe who will attend and who will bring to the meeting the results of at least eight years of such formal interurban amity and conference as America is just beginning to venture on.

CIPRIANO CASTRO is under pretty close surveillance, but this does not prevent him from getting into the newspapers.

IT WAS asserted recently that New York city's then available water supply would not last to exceed six weeks. Later there was a heavy local rainfall, and it was claimed that this increased the supply by fully twelve days. Of course, only a small percentage of the rainfall throughout the watershed was saved for reservoir purposes, but this serves only to strengthen the proposition that if rain water were only harvested in a small way throughout the year there would be little cause for the complaints of shortage that are becoming a regular accompaniment of dry periods.

A movement is well on foot in New York state now for the conservation of water for power purposes. There is no reason why a movement for the conservation of water for drinking and general domestic and municipal purposes should not go hand in hand with it. It is at length proposed to do for power what thoughtful people have been urging on the consideration of lawmakers in many parts of the country for several years past. That is, to store the surplus water of the streams and rivers in reservoirs which may be drawn upon when the streams and rivers run low. This simply means the conservation of rain water, since the rainfall regulates the rise and fall of the waterways and determines whether there shall be floods or drought.

It would be utterly impossible to estimate in thousands or millions of gallons the amount of water that runs to waste in this country annually. It is no exaggeration to say, however, that if the surplus water were stored it would be sufficient to assure a permanent depth to river channels, thereby making navigation possible and comparatively easy all the year round; to assure the creation of power sufficient to run all the machinery of the country, and to assure an unfailing supply of water for irrigation, for municipal purposes, for domestic use.

Here is a case in which conservation could not only be made to pay for itself almost from the start but to provide a great and permanent source of revenue for most of the individual states. Governor Dix, a manufacturer and user of water-power, has come out openly in favor of water conservation and storage. He would have the state of New York own the storage reservoirs and control forever the power generated from them. He declares it to be his opinion that this power should and could be rented on comparatively short term leases to manufacturers at a low price, and that the cheapness of the power would promote industry. What could and should be done elsewhere. New York and the other states should go farther. They should control their water supply absolutely.

Water comes so freely that in the past it has been valued all too lightly. With the increasing demand for it in all the industries, whose wants and needs are constantly growing more numerous and exacting, waste of it will soon be regarded as an offense against public policy. Conservation of it will then be not only desirable but the imperative duty of the state.

THE Chicago visitors have now seen Boston's beautiful harbor, and the experience will doubtless make them all the more anxious to have a beautiful harbor of their own. They have the water at home, and plenty of it, but what they need most is a few islands; and D. H. Burnham is as ready as ever to show them how islands can be made.

GOVERNOR WILSON of New Jersey makes no comment on the last Legislature; but of the bills left for the Governor's consideration thirty-six have been vetoed so far, and only six signed.

What Chicago Visitation Portends

Conservation of Rain Water
